PROFESSIONAL SUMMARY

Full-stack engineer with 2+ years building production web and mobile applications. Specialized in React/Next.js frontend architecture and Node.js backends with proven experience in performance optimization and multi-tenant SaaS development. Strong track record delivering scalable solutions in fast-paced startup environments

CORE COMPETENCIES

Full-Stack Architecture	React/Next.js + Node.js/Express
Performance Engineering	Achieved 95+ PageSpeed scores, 45% load time improvements
Multi-tenant Systems	Built scalable SaaS platforms with subdomain isolation
Mobile Development	Flutter, Native Android
Database Design	PostgreSQL, MongoDB, Firebase - optimized for scale
DevOps & Deployment	Docker, CI/CD, GitHub Actions, automated deployment pipelines

PROFESSIONAL EXPERIENCE

Frontend Engineer
Komkits

May 2025 - Present
Remote(Contract)

- Architected multi-tenant SaaS platform serving **50+ businesses** with subdomain isolation, reducing customer onboarding time through automated setup flows
- Built AI workflow automation system processing **500+ invoices/month**and saving clients an average of **15 hours/week**
- Optimized application performance using SWR caching and code splitting, achieving **45% faster load times** and improving user retention by **25%**
- Implemented role-based authentication system supporting **5 user tiers** across multiple tenants, ensuring **99.9% security compliance**

Software Engineer
K4RM4 Social Feedback Systems

October 2024 – May 2025
Kochi

- Architected AI-powered content workflow reducing research time by **80%**, enabling team to scale from **5 to 15 articles/week**
- Delivered **10+ high-performance websites** with **95+ Google PageSpeed scores**, improving client conversion rates by an average of **30%**
- Implemented CI/CD pipelines with Github, accelerating deployment cycles by **60%** and reducing production bugs by **40%**
- Led technical mentoring for 2 junior developers, establishing code review processes and best practices

Frontend Developer
Flickwise

May 2024 – October 2024
Remote

- Built responsive web applications for **8+ NGO and startup clients** using Next.js and WordPress, achieving **100% client satisfaction** ratings
- Optimized mobile-first interfaces resulting in **40% more** in mobile user engagement across client websites
- Delivered pixel-perfect solutions under tight deadlines, maintaining **95% on-time delivery** rate

Software Developer   April 2020 – January 2021
Hireflex Global   *Bangalore(Hybrid)*

- Developed and published Flutter app with Firebase backend achieving **1,000+ downloads** and **4.2 Play Store rating**
- Built recruitment management system using React.js, improving internal workflow efficiency by **50%**
- Integrated Vimeo CDN and push notifications, achieving **99% uptime** and real-time user engagement

FEATURED PROJECTS

Komkits Multi-Tenant Platform *Next.js 15, TypeScript, PostgreSQL, Express.js*

- Production SaaS serving **50+ businesses** with automated workflow engine processing **2,000+ transactions/month**
- Built real-time dashboard with WebSocket connections and node-based automation workflows
- Implemented subdomain isolation, payment processing, and comprehensive reporting with export capabilities

Pregsee Mobile App *Flutter, Firebase, Published on Play Store*

- Consumer mobile app with **1,000+ active users** and **4.2 Play Store rating**
- Implemented milestone tracking, push notifications, and video integration using clean architecture patterns

The Capitalist Journal *Next.js, PostgreSQL, SSR*

- High-performance news platform with **98+ PageSpeed score** and **10K+ monthly visitors**
- Implemented advanced SSR optimization and SEO strategies resulting in **300% organic traffic growth**

Ternlyf Social Platform *Flutter, Supabase, Clean Architecture*

- Social application with PostgreSQL backend implementing clean architecture and BLoC pattern
- Built real-time profile updates and subscription system with proper separation of concerns

TECHNICAL LEADERSHIP & IMPACT

- **Performance Optimization Expert**: Consistently achieved 95+ PageSpeed scores across 15+ production applications
- **Mentorship**: Guided 3 junior developers in React best practices and clean architecture principles
- **Process Improvement**: Established coding standards and review processes reducing production bugs by 40%
- **Open Source Contribution**: Active contributor to Flutter community projects and OpenFoodFacts (500K+ installs)

EDUCATION

B.Tech in Computer Science Engineering   2020 – 2024
APJ Abdul Kalam Technological University   *CGPA 6.7/10*

- Specialized in full-stack development, data structures, algorithms, and software engineering
- Led capstone projects in mobile and web application development with focus on scalable architecture

ACHIEVEMENTS & RECOGNITION

- **Google Cloud Agentic AI Hackathon** – Finalist of worlds largest hackathon with 1941+ participants.
- **Technical Leadership** – Executive Member, CODIAC; organized workshops for 200+ students
- **Event Management** – Hackathon Coordinator, Lasya 2023; managed 100+ participants and 10K+ budget
- **Community Impact** – Technical Mentor, Tink-her-Hack 3.0; guided 15+ teams in full-stack development
- **Publications** – Apps featured on Play Store with combined 1K+ downloads and 4+ star ratings
